

I really don't appreciate people continually messing around with our First Amendment rights. They did it with CB radios. They did it with Satellite television. They did it with Cable. Now they want to do it to xmradio. We need to put a stop to it or they might try to mess with the air that we breathe. Xmradio provides variety and quality of service that AM and FM radio falls short of providing because when your traveling accross the country you have to continually try to find the type of music you like whenever you travel beyond that station range. This can also be very unsafe because you end up taking your attention from the road and traffic all around you. With XM radio you never lose the station your listening to unless you go through a tunnel. We respectfully urge the FCC to reject the NAB's petition 04-160 and we totally support XM's ability to provide the kind of programming that all of us demand and deserve.
